

Abranet® Heavy Duty

Mesh abrasives for
demanding applications

Abranet[®] HD - Aggressive, durable and

MIRKA ABRANET HD. As you'd expect from a world leader in abrasives technology, Abranet HD is not your average sanding material. It has been specifically developed to efficiently tackle the most demanding surface conditioning and repair applications. Abranet HD uses a nylon mesh backing material (in contrast to paper) to create a more flexible and durable abrasive product. As a result, Abranet HD produces a more consistent surface finish more quickly and, because it also has excellent resistance to edge wear and clogging, it lasts longer, too.

Abranet Heavy Duty can provide a more effective solution for your extreme sanding needs:

- Excellent durability – retains its high performance sanding properties for far longer, especially on the toughest applications.
- Unique, patented abrasive material resists clogging and delivers long lasting performance.
- Designed for optimum performance in both vacuum and conventional sanding operations.
- Outstanding performance on demanding applications such as reinforced composite material.
- Open mesh design dissipates heat, providing a cooler work surface.
- Manufactured in accordance to Mirka's ISO 14001 environmental system.

Abrasives for heavy duty applications

Abranet HD • Technical specifications	
Grain	Special Aluminum Oxide
Bonding	Resin over Resin
Backing	Nylon Mesh
Coating	Semi-open
Color	Brown / White
Grit range	P 40, P 60, P80

PRODUCT RANGE.

Abranet HD is available in a variety of disc and sheet applications for extreme heavy duty applications in aerospace, composite, marine and automotive sectors. The exceptional edge wear and durability is ideal for situations where conventional abrasives fail.
