

MIRKA

Marine Finishing Products

Quality from start to finish

KWH Mirka Ltd produces abrasives for different applications as well as complete sanding systems for demanding conditions. We also market accessories suitable for our basic product range, such as polishing compounds, finishing sanders, vacuum equipment, sanding blocks and various other sanding accessories. Mirka is a specialist in flexible abrasives and abrasives that allow for dust controlled surface finishing. The company has become a forerunner in this specialist area by placing a strong emphasis on product development. This development has been backed up by an effective production system and many decades of experience.

The dust-controlled sanding offered by Mirka's Abranet® mesh abrasives provides superior results and a cleaner work environment. A full line of finishing products is available, including Abralon® foam-backed finishing discs, Bulldog Gold discs, Royal Coarse Cut sheets and discs, waterproof abrasives and Polarshine™ polishing compounds.

From start to finish, Mirka offers a complete solution for marine surface finishing.

Abralon®

- Combines benefits of abrasive cloth and non-woven products.
- Constructed with a fabric face, foam center and a grip backing.
- Abrasive grains are bonded evenly to the fabric face.
- Openings in the fabric allow water, solvent and air to flow freely around the abrasive.
- Works especially well when sanding contoured surfaces and sharp edges.
- Open cell design holds large amounts of water or solvent for lubrication and cooling.
- Foam center also provides for even surface pressure that helps eliminate "finger marks" when hand sanding.

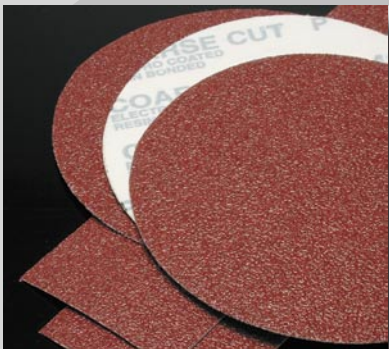

Abranet®

- Patented mesh construction with uniform abrasive coating provides dust controlled sanding when used with a vacuum system..
- Features hook and loop backing for easy disc attachment.
- Vacuum performance offers greater efficiency, better sanding.
- Non-clogging disc eliminates pilling problems.
- Even surface scratch and dust removal improves finish of topcoat.
- Long lasting discs require less use of materials.
- Dust removal offers improved operator safety.
- Abranet provides a better work environment, less environmental impact.

Bulldog Gold

- Gold is designed for finishing and heavy stock removal.
- The durable aluminum oxide grain delivers a fast, exceptionally long lasting cut.
- Gold's high strength resin bonding provides superior grain support.
- Proprietary backing is stronger than other competitive brands using traditional backing.
- A special stearate coating is used to maximize resistance to clogging and loading.
- A uniform, semi open coat design produces an even, consistent scratch pattern.

Royal Coarse Cut

- Progressive Bond™ Technology provides special grain bonding for extreme edge wear resistance.
- Aggressive abrasive in coarse grades cuts quickly, and is long lasting.
- Flexible for use on contoured surfaces.
- Specially reinforced paper exclusive to Mirka provides superior grain support.
- Semi open coat produces a consistent scratch pattern that can be easily removed - while resisting loading.

Polarshine™

- Polarshine polishing compounds are suitable for polishing, removal of scratches and sealing of all kind of surfaces in the marine industry.
- Polarshine M25 is a coarse compound for polishing of gel coat.
- It is suitable for polishing and removal of sanding marks from P800 and finer after sanding with Mirka's unique abrasive products.
- For machine application.
